Building Inspections

A Zoning Permit may be required before building permits can be issued. Drawings for projects need to be submitted at least two weeks prior to issuance of building permits. All subcontractors should obtain their own permits. Fees are based on the general construction portion only. Project costs should be rounded to the nearest thousand. Minimum permit fee for all permit types is $75 for Residential and $150.00 for Commercial. The permit fee for all permit types when work is started prior to a required permit is double the permit fee. Re-inspection fee is $75.00.
