10. What do you think would increase trail usage or bring new users to the North Asheboro Greenway?

Marketing the project more.

yesterday

Building the greenway in such a way that it can easily be connected, expanded or integrated in the future to a wider greenway network around Asheboro. It would be an amazing way to spur development, investment and connectivity for citizens to engage with each other as well as local businesses. Greenways are a great way to bring together Asheboro's unique and distinct neighborhoods to create a positive identity and fabric.

yesterday

Ok to use near sewer access if the smell is kept away. Make it scenic and easy access and nice path.

11. Please provide any additional comments or feedback for the North Asheboro Greenway Feasibility Study.

I look forward to utilizing it, my family and I love greenways and especially love a well created/planned one.

yesterday

I hope this works out as there really aren't any good trails in the area and the little path at North Asheboro Park is too short and needs repair from all the roots.

I support these kinds of projects in our community.

I don't think parents would let kids walk a greenway/trail to school. Also don't know why you'd need a greenway to get to the park to then walk or do the exercise opportunities. North Asheboro needs more revitalization in business and clean up of existing neighborhoods. That should be the focus.
